PATHOLOGY UPDATE - 2017

The most common sites of malignancy in females are Cervix, Ovary, Breast in that order, but surprisingly in the recent consensus report in our four metros, Carcinoma Breast has surpassed the other two, may be because of increasing awareness, screening methods, and early detection.

This disturbing trend had inspired us to take an in-depth review of the subject and hence an update on Breast Pathology was conceived. The inclusion of Radiologist, Oncologists (Medical, Surgical, Radiation) will make the update all the more comprehensive and interesting. Lectures by both international and national speakers followed by an interactive slide session will be a great learning experience for both junior and senior pathologists alike.

We are pleased to invite you to **"KAMSRC PATHOLOGY UPDATE 2017"** CME Program on Saturday, May 20, 2017 at Indira Auditorium, Kamineni Hospitals, L.B. Nagar, Hyderabad.

We look forward to your active participation in making this event a grand success.

Dr. A. K. Deshpande
Organizing Chairperson

Dr. E. Jayashankar
Organizing Secretary

Dr. A. Sudha & Dr. K. Padmaja
Joint Organizing Secretaries
